### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for Allowance:

The prior arts of record teach a high-speed digital cable tester. Cable testing system also determines the continuity paths of the cable and also detects intermittent faults. He also teaches that there are two main subsystems of the invention, a serial processing subsystem and a dynamic stimulation subsystem. The signal processing subsystem transmits test signals through individual pins and conductors of the cable under test and determines the continuity path. Miskimins et al., (U.S. Patent number 6230109) is one such example of prior art. The prior art of record, however, fails to teach, singly or in combination a linking device that enables a controller to communicate with a plurality of smart field devices, the linking device being further operable to automatically detect a communications problem associated with the protocol bus. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of systems for automatically detecting, diagnosing and reporting wiring faults.

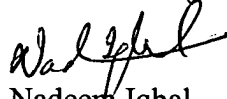

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled: "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nadeem Iqbal whose telephone number is (571)-272-3659. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.
